Dear Shareholder,

For the Funds' fiscal year ending April 30, 2018, global financial markets closed markedly higher after a strong 12 months. Most stock markets around the world rebounded after a difficult prior year. Global equities, as measured by the MSCI All Country World Index, registered a total return of 14.51% for the fiscal year. Developed market equities, as represented by the MSCI World Index, returned 13.58%, while emerging market stocks, as represented by the MSCI Emerging Markets Index, posted a strong 21.89% return for investors. By comparison, the S&P 500 Index produced a total return of 13.06%.

The 12-month period saw several defining events in financial markets, including the continuation of US monetary policy normalization by the US Federal Reserve, escalation of trade negotiations between the US and various trading partners, increased tension in Syria translating into deeper sanctions on Russia, and potential peace on the Korean peninsula. Investors were also focused on rebounding energy prices, China's focus on governance improvements, and elections or forthcoming elections in many emerging market economies including South Africa, Russia, India, Brazil, and Mexico.

The first nine months of the fiscal year were a continuation of last year's strong performance, as markets benefitted from tax reform in the US, higher oil prices, and prospects for normalization of monetary policy across developed markets. The US dollar, as measured by the DXY index, also continued to trend weaker, creating an attractive environment for equities – specifically in emerging markets.

It was not until the end of the fiscal year that we saw a slight pullback in emerging market performance. Geopolitical tensions and government leaders publically criticizing private companies led to what we believe was a dislocation between market movements and company fundamentals. In addition, we saw a combination of short-term profit taking and a sharp appreciation of the US dollar. The trade dispute between the US and China, technical trading around the symbolic 3% threshold for 10-year treasury yields, and signs of economic deterioration coming out of Europe also added to the volatility in emerging markets.

China continues to walk a tight rope by tightening its economy as the external demand environment improves. The mandate remains multi-dimensional and includes growth stabilization, economic rebalancing, and supply-side structural reforms, all while maintaining financial stability. The Chinese government is focused on high quality growth, which we believe will be positive for environmental, healthcare, tourism, and high-end manufacturing companies, but negative for low value-add and high polluting businesses. From an investor perspective, it is also important to note, that China continues to focus on improving standards for corporate governance and oversight. On the political front, the Chinese Communist Party removed the two term limit for the presidency in a move that would allow President Xi Jinping to remain in office beyond 2023. We believe this is generally positive in the short to medium term as it will allow President Xi to continue with his economic reforms.

We continue to see positive reform stories in other areas of emerging markets as well. In South Africa, the election of Cyril Ramaphosa as the 13th president of the African National Congress party was well received by the market. Brazil also continued to display the power and independence of its government institutions, specifically its central bank and judiciary system. In other countries, Mexico has made significant progress in NAFTA* negotiations and Greece appears ready to emerge out of the International Monetary Fund's bailout program.

Many of the macroeconomic factors that dominated financial markets during the fiscal year ended April 30, 2018 continue to command the market's attention. Whether it be the direction of commodity prices, US interest rates, the US dollar, leading central bank policies, China's economy, or overall global growth, the market has experienced a strong rebound and should continue to look at these drivers as a base for future performance.

Amid a backdrop where macro factors can prove erratic, we are encouraged by the investment opportunities offered by structural trends that can flourish in various environments. One such trend is the broad-scale consumption resulting from an expanding emerging market middle class. We firmly believe that the most effective way to invest in these durable, structural trends is to take a long-term and active investment approach.

As emerging market experts with roots in Asia and teams across the globe, Mirae Asset Global Investments pursues excellence in investment management to help our clients achieve their long-term objectives. This past fiscal year marked the seventh anniversary of our Emerging Markets and Asia mutual funds in the Mirae Asset Discovery Funds series. We remain encouraged by the earnings prospects of companies operating in the emerging markets, and hope that you share our enthusiasm for the future.

Best regards,

Peter Lee, Ph.D., CFA
Chief Executive Officer
Mirae Asset Discovery Funds

Emerging Markets Fund

MANAGER COMMENTARY

The Emerging Markets Fund (the “Fund”) – Class I Shares outperformed the Fund’s benchmark, the MSCI Emerging Markets Index, for the period May 1, 2017 through April 30, 2018. The Fund gained 22.17% whereas the benchmark returned 22.14%.

On a sector basis, Industrials and Consumer Discretionary were leading contributors to the Fund’s outperformance during the fiscal period, mainly due to stock selection. Utilities was the largest detractor due to stock selection. With regards to country exposure, South Africa and China were top contributors to relative performance primarily due to stock selection. Stock selection and allocation effects in South Korea, however, had the biggest negative impact. On a stock level, the top contributors were Ping An Insurance (Group) Company of China, Celltrion Healthcare Co., and Sunny Optical Technology (Group) Co. and the biggest detractors were Qudian, Inc., Mando Corp., and Tencent Holdings.

Emerging market equities continued their torrid pace through much of the past 12 months, but ended on a more tepid note. The asset class continued to see significant inflows driven by political and economic reform stories across the region, improving growth prospects in the US, and a strong environment for oil prices. Despite this favorable environment, we saw geopolitical rhetoric drive a dislocation between stock performance and fundamentals at the end of the fiscal year.

Emerging markets continued to benefit from both political and economic reform stories. South Africa saw a close election for the new leader of the African National Congress party, where market friendly Cyril Ramaphosa emerged victorious. The party was then quick to remove President Zuma from the executive branch and replace him with its new leader, which removed political uncertainty and positioned the government for much needed fiscal and government reforms. Brazil also continued to display the power and independence of its government institutions, specifically its central bank and judiciary system. Brazil’s central bank brought inflation within its target levels, which allowed it to move forward with an impactful rate-cutting cycle. On the judiciary side, the Brazilian Supreme Court brought former President Lula to trial on corruption charges, and sentenced him to prison. This move dramatically improved the 2018 Presidential election landscape for the country. In other countries, Mexico has made significant progress in NAFTA* negotiations, Greece appears ready to emerge out of the International Monetary Fund’s bailout program, and Egypt began a monetary easing cycle on top of a fiscal reform program.

In Asia ex-Japan, robust earnings in the region and a stable macroeconomic environment, particularly in China, led to strong gains in 2017. A supportive external environment boosted exports and growth turned stronger in most economies while inflation remained benign, allowing Asian central banks to maintain accommodative monetary policies. Following the 19th Chinese Communist Party Congress, the Chinese government stated their commitment to balanced growth and a more consumption-led economy, with a greater focus on innovation and the environment. The geopolitical tensions in the Korean peninsula saw a pattern of escalation and de-escalation throughout most of 2017. However, the situation has seen marked improvements this year with North Korean leader Kim Jung-un expressing a willingness to have diplomatic discussions with South Korea and the US. Tensions between China and South Korea have also improved. South Korea’s inbound tourist traffic growth turned positive in March 2018 for the first time since China’s travel ban was implemented a year ago. In India, the implementation of the goods and services tax in July 2017 caused some transitory disruptions to the economy. However, the economy was able to make a steady recovery and key macro indicators signaled robust underlying demand conditions.

The rebound in commodity prices was also a significant driver of the emerging market asset class last year. Oil rallied roughly 46%, iron ore rallied as much as 19% before ending the year down only about 7%, and copper prices moved up about 15%. The continued resilience in commodity prices came off a number of factors. First, the US dollar (as measured by the DXY) weakened roughly 7% over the period. Second, Chinese growth remained steady and the country’s supply side reforms (focused on reducing inefficient and high polluting production) continued to create favorable supply and demand dynamics. Lastly, the combination of strong developed market growth, expectations for an extension to OPEC** production target agreements, and geopolitical concerns in both Russia and the Middle East led to a sharp increase in energy prices. Global politics also displayed a tilt towards protectionism, which lead the market to believe that growth could be driven more by domestic resources and fiscal spending, which in our view generally bodes well for demand of commodities.

With a pick-up in growth, attractive valuations, and a low base for earnings, emerging markets continued to attract flows into the asset class. That said, end-of-the-period performance took a pause, in-line with the rest of the world, due to a combination of short-term profit taking and a sharp appreciation of the US dollar. The recent dollar spike saw the DXY strengthen about 3% in less than a month due to speculation that the trade war between the US and China might escalate, technical trading around the symbolic 3% threshold for 10 year treasury yields, and signs of economic deterioration coming out of Europe. Emerging market equities were also affected by the pullback in global tech shares and additional US sanctions on Russia.

With fundamentals still intact and emerging market economies looking their healthiest in recent history, we see the recent dislocation as a unique opportunity to build larger positions in high conviction positions. We continue to see a rare combination of attractive valuations, improving growth expectations, and positive reformation stories in emerging markets. We remain optimistic on emerging markets and firmly believe that a selective and active strategy is essential for responsibly navigating the asset class.

*NAFTA = North American Free Trade Agreement **OPEC = Organization of the Petroleum Exporting Countries.

Past performance does not guarantee future results. The performance data quoted represent past performance and current returns may be lower or higher. The performance quoted reflects fee waivers or expense reimbursements in effect and would have been lower in their absence. Risk Factors

Equity Securities Risk – Equity securities are more volatile and carry more risk than other forms of investments, including investments in high-grade fixed income securities. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes.

Emerging Market Risk – Investing may be subject to additional economic, legal, political, liquidity, and currency risks not associated with more developed countries.

Foreign Securities Risk – Foreign investments may be subject to different and, in some cases, less stringent regulatory and disclosure standards than US investments. Political concerns, fluctuations in foreign currencies and differences in taxation, trading, settlement, custodial and other operational practices may result in foreign investments being more volatile and less liquid than US investments.

Geographic Concentration Risk – A small number of companies and industries may represent a large portion of the market in a particular country or region, and these companies and industries can be sensitive to adverse social, political, economic or regulatory developments in that country or region.

You should consider an investment in the Fund as a long-term investment. The Fund's returns will fluctuate over long and short periods.

There can be no guarantee that any strategy (risk management or otherwise) will be successful. All investing involves risk, including potential loss of principal.

Emerging Markets Fund

INVESTMENT OBJECTIVE

The Emerging Markets Fund (“the Fund”) seeks to achieve long-term capital growth.

HYPOTHETICAL GROWTH OF A \$10,000 INVESTMENT*

* The chart represents historical performance of a hypothetical investment of \$10,000 in the Emerging Markets Fund and reflects the reinvestment of dividends and capital gains in the Fund.

(a) The gross expense ratios reflect the expense ratios as reported in the Fund’s Prospectus dated August 28, 2017. However, the Fund’s investment manager has agreed to contractual waivers in effect through August 31, 2018, which will continue in effect for annual periods ending on August 31 unless terminated by the Fund’s investment manager not less than 30 days prior to the then annual period, and has agreed to limit total annual fund operating expenses to the net expense ratios shown. Please see the Fund’s most recent prospectus for details. Additional information pertaining to the Fund’s expense ratio as of April 30, 2018 can be found in the financial highlights.

(b) Reflects the 5.75% maximum sales charge.

(c) Reflects the 1.00% maximum deferred sales charge.

(d) MSCI Emerging Markets Index is an unmanaged free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. It is not possible to invest directly in an index. The performance of the index does not reflect the deduction of expenses associated with a mutual fund, such as investment management and accounting fees.

Past performance does not guarantee future results. Return calculations assume the reinvestment of distributions and do not reflect taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor’s shares, when redeemed may be worth more or less than the original cost. The performance above reflects any fee waivers or reimbursements during the applicable periods. If such fee waivers or reimbursements had not occurred, the quoted performance would be lower. To obtain performance information current to the most recent month-end, please call (888) 335-3417 or visit <http://investments.miraeasset.us>.

Asia Fund

MANAGER COMMENTARY

The Asia Fund (the “Fund”) – Class I Shares outperformed the Fund’s benchmark, the MSCI AC Asia ex-Japan Index, for the period May 1, 2017 through April 30, 2018. The Fund gained 25.56% whereas the benchmark returned 24.35%.

On a sector basis, Healthcare was the leading contributor to the Fund’s outperformance during the fiscal period due to stock selection and an overweight allocation. Stock selection in Information Technology also had a positive impact. Materials was the largest detractor due to stock selection and allocation effects. With regards to country exposure, China was the top contributor to relative performance due to stock selection and allocation effects. Stock selection and allocation effects in South Korea and India, however, had the biggest negative impact. On a stock level, the top contributors were Ping An Insurance (Group) Company of China, Celltrion Healthcare Co., and Sunny Optical Technology (Group) Co., and the biggest detractors were Qudian, Inc., Ctrip.com International, and Hanssem Co.

Asia ex-Japan equities posted strong gains in 2017, outperforming developed markets. Robust earnings in the region and a stable macroeconomic environment, particularly in China, underpinned the strong gains. A supportive external environment boosted exports and growth turned stronger in most economies while inflation remained benign, allowing Asian central banks to maintain accommodative monetary policies. In the first quarter of 2018, there was greater market volatility as investors became more concerned about inflation and the US interest rate outlook, as well as the risk of US protectionist measures, particularly the tariff and trade issues with China.

There has been growing evidence over the past year that the Chinese economy had progressed to a phase of transition. Following the 19th Chinese Communist Party Congress, the Chinese government stated their commitment to balanced growth and a more consumption-led economy, with a greater focus on innovation and the environment. The economy posted a 6.9% real GDP* growth rate for 2017 and 6.8% for the first quarter of 2018. Consumption remains the key driver, contributing to over 77% of GDP growth. Notably, the Chinese government’s efforts to rein in the corporate debt level appears to have been successful.

The geopolitical tensions in the Korean peninsula saw a pattern of escalation and de-escalation throughout most of 2017. However, the situation has seen marked improvements this year with North Korean leader Kim Jung-un expressing a willingness to have diplomatic discussions with South Korea and the US. THAAD** related tensions between China and South Korea have also improved, as China announced that retaliatory measures would be lifted. South Korea’s inbound tourist traffic growth turned positive in March 2018 for the first time since China’s travel ban was implemented a year ago.

In India, the implementation of the goods and services tax in July 2017 caused some transitory disruptions to the economy. However, the economy was able to make a steady recovery and key macro indicators signaled robust underlying demand conditions. It appears to us that market sentiment on the country’s rural recovery is also rising, as it is expected that the Indian government will likely focus more on rural development and social spending leading up to the 2019 general elections.

Elsewhere in Asia, the ASEAN*** region has benefitted from the global growth cycles supporting exports. Importantly, we believe healthier macro fundamentals compared to the ‘taper tantrum’ period in 2013 should enable most countries to be in a better position to handle rising US yields.

Overall, our current outlook remains positive for the year ahead. Although the cyclical recovery is maturing, we believe there is still room for growth as we see limited signs of overheating. The key areas we will be watching include US protectionism, China’s tightening policies and global geopolitical risks.

*Gross Domestic Product (GDP) is the monetary value of all the finished goods and services produced within a country’s borders in a specific time period.

**THAAD = Terminal High Altitude Area Defense.

***Association of Southeast Asia Nations (ASEAN) is the organization of countries in Southeast Asia set up to promote cultural, economic and political development in the region.

Emerging Markets Great Consumer Fund

MANAGER COMMENTARY

The Emerging Markets Great Consumer Fund (the “Fund”) – Class I Shares outperformed the Fund’s benchmark, the MSCI Emerging Markets Index, for the period May 1, 2017 through April 30, 2018. The Fund gained 26.25% whereas the benchmark returned 22.14%.

On a sector basis, Industrials and Consumer Discretionary were leading contributors to the Fund’s outperformance during the fiscal period mainly due to stock selection. Healthcare was the largest detractor primarily due to stock selection. With regards to country exposure, China was the top contributor to relative performance due to stock selection and allocation effects. Stock selection in South Africa also had a positive impact on relative performance. Stock selection and allocation effects in South Korea and Indonesia, however, had the biggest negative impact. On a stock level, the top contributors were Alibaba Group Holding, TAL Education Group, and Ping An Insurance (Group) Company of China and the biggest detractors were Apollo Hospitals Enterprise, Universal Robina Corp., and Ctrip.com International.

Emerging market equities continued their torrid pace through much of the past 12 months, but ended on a more tepid note. The asset class continued to see significant inflows driven by political and economic reform stories across the region, improving growth prospects in the US, and a strong environment for oil prices. Despite this favorable environment, we saw geopolitical rhetoric drive a dislocation between stock performance and fundamentals at the end of the fiscal period.

Emerging markets continued to benefit from both political and economic reform stories. South Africa saw a close election for the new leader of the African National Congress party, where market friendly Cyril Ramaphosa emerged victorious. The party was then quick to remove President Zuma from the executive branch and replace him with its new leader, which removed political uncertainty and positioned the government for much needed fiscal and government reforms. Brazil also continued to display the power and independence of its government institutions, specifically its central bank and judiciary system. Brazil’s central bank brought inflation within its target levels, which allowed it to move forward with an impactful rate cutting cycle. On the judiciary side, the Brazilian Supreme Court brought former President Lula to trial on corruption charges, and sentenced him to prison. This move dramatically improved the 2018 Presidential election landscape for the country. In other countries, Mexico has made significant progress in NAFTA* negotiations, Greece appears ready to emerge out of the International Monetary Fund’s bailout program, and Egypt began a monetary easing cycle on top of a fiscal reform program.

In Asia ex-Japan, robust earnings in the region and a stable macroeconomic environment, particularly in China, led to strong gains in 2017. A supportive external environment boosted exports and growth turned stronger in most economies while inflation remained benign, allowing Asian central banks to maintain accommodative monetary policies. Following the 19th Chinese Communist Party Congress, the Chinese government stated their commitment to balanced growth and a more consumption-led economy. Real GDP** growth in China reached 6.9% in 2017 and 6.8% for the first quarter of 2018. Consumption remains the key growth driver, contributing to over 77% of GDP growth in the first quarter of this year. The geopolitical tensions in the Korean peninsula have seen marked improvements this year with North Korean leader Kim Jung-un expressing a willingness to have diplomatic discussions with South Korea and the US. Tensions between China and South Korea have also improved. South Korea’s inbound tourist traffic growth turned positive in March 2018 for the first time since China’s travel ban was implemented a year ago. In India, the implementation of the goods and services tax in July 2017 caused some transitory disruptions to the economy. However, the economy was able to make a steady recovery and key macro indicators signaled robust underlying demand conditions.

The rebound in commodity prices was also a significant driver of the emerging market asset class last year. Oil rallied roughly 46%, iron ore rallied as much as 19% before ending the year down only about 7%, and copper prices moved up about 15%. The continued resilience in commodity prices came off a number of factors. First, the US dollar (as measured by the DXY) weakened roughly 7% over the period. Second, Chinese growth remained steady and the country’s supply side reforms (focused on reducing inefficient and high polluting production) continued to create favorable supply and demand dynamics. Last, the combination of strong developed market growth, expectations for an extension to OPEC*** production target agreements, and geopolitical concerns in both Russia and the Middle East led to a sharp increase in energy prices. Global politics also displayed a tilt towards protectionism, which lead the market to believe that growth could be driven more by domestic resources and fiscal spending, which generally bodes well for demand of commodities.

With a pick-up in growth, attractive valuations, and a low base for earnings, emerging markets continued to attract flows into the asset class. That said, end-of-the-period performance took a pause, in-line with the rest of the world, due to a combination of short-term profit taking and a sharp appreciation of the US dollar. The recent dollar spike saw the DXY strengthen about 3% in less than a month due to speculation that the trade war between the US and China might escalate, technical trading around the symbolic 3% threshold for 10 year treasury yields, and signs of economic deterioration coming out of Europe. Emerging market equities were also affected by the pullback in global tech shares and additional US sanctions on Russia.

With fundamentals still intact and emerging market economies looking their healthiest in recent history, we see the recent dislocation as a unique opportunity to build larger positions in high conviction positions. We continue to see a rare combination of attractive valuations, improving growth outlooks, and positive reformation stories in emerging markets. We remain optimistic on emerging markets and firmly believe that a selective and active strategy is essential for responsibly navigating the asset class.

MSCI Emerging Markets Index ^(d)	22.14%	5.11%	4.08%		

HYPOTHETICAL GROWTH OF A \$10,000 INVESTMENT*

* The chart represents historical performance of a hypothetical investment of \$10,000 in the Emerging Markets Great Consumer Fund and reflects the reinvestment of dividends and capital gains in the Fund.

(a) The gross expense ratios reflect the expense ratios as reported in the Fund's Prospectus dated August 28, 2017. However, the Fund's investment manager has agreed to contractual waivers in effect through August 31, 2018, which will continue in effect for annual periods ending on August 31 unless terminated by the Fund's investment manager not less than 30 days prior to the then annual period, and has agreed to limit total annual fund operating expenses to the net expense ratios shown. Please see the Fund's most recent prospectus for details. Additional information pertaining to the Fund's expense ratio as of April 30, 2018 can be found in the financial highlights.

(b) Reflects the 5.75% maximum sales charge.

(c) Reflects the 1.00% maximum deferred sales charge.

(d) MSCI Emerging Markets Index is an unmanaged free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. It is not possible to invest directly in an index. The performance of the index does not reflect the deduction of expenses associated with a mutual fund, such as investment management and accounting fees.

Past performance does not guarantee future results. Return calculations assume the reinvestment of distributions and do not reflect taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed may be worth more or less than the original cost. The performance above reflects any fee waivers or reimbursements during the applicable periods. If such fee waivers or reimbursements had not occurred, the quoted performance would be lower. To obtain performance information current to the most recent month-end, please call (888) 335-3417 or visit <http://investments.miraeasset.us>.

Mirae Asset Discovery Funds Expense Examples (Unaudited)

As a Fund shareholder, you may incur three types of costs: (1) transaction costs, including wire redemption fees and sales charges, as applicable; (2) ongoing costs, including management fees; distribution and service (12b-1) fees; and (3) other Fund expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

These examples are based on an investment of \$1,000 invested at November 1, 2017 and held for the entire period from November 1, 2017 through April 30, 2018.

The **Actual Expense** figures in the table below provide information about actual account values and actual expenses. You may use this information, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number corresponding to your Fund and share class in the table under the heading entitled "Actual Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

The **Hypothetical Expense** figures in the table below provide information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not each Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the examples are useful in comparing ongoing costs only and will not help you determine the relative total cost of owning different funds. In addition, if these transactional costs were included, your expenses would have been higher.

Fund		Beginning Account Value 11/1/17	Actual Ending Account Value 4/30/18	Hypothetical Ending Account Value 4/30/18	Actual Expenses Paid During Period 11/1/17 – 4/30/18 ⁽¹⁾	Hypothetical Expenses Paid During Period 11/1/17 – 4/30/18 ⁽¹⁾	Annualized Expense Ratio During Period 11/1/17 – 4/30/18
Emerging Markets Fund	Class A	\$1,000.00	\$1,032.20	\$1,017.36	\$ 7.56	\$ 7.50	1.50%
	Class C	1,000.00	1,028.20	1,013.64	11.31	11.23	2.25%
	Class I	1,000.00	1,034.00	1,018.60	6.30	6.26	1.25%
Asia Fund	Class A	1,000.00	1,055.50	1,017.36	7.64	7.50	1.50%
	Class C	1,000.00	1,051.60	1,013.64	11.45	11.23	2.25%
	Class I	1,000.00	1,056.60	1,018.60	6.37	6.26	1.25%
Emerging Markets Great Consumer Fund	Class A	1,000.00	1,070.50	1,017.36	7.70	7.50	1.50%
	Class C	1,000.00	1,066.00	1,013.64	11.53	11.23	2.25%
	Class I	1,000.00	1,071.40	1,018.60	6.42	6.26	1.25%

(1) Expenses are equal to the average account value over the period multiplied by the Fund's annualized expense ratio, multiplied by 181/365 (to reflect the one-half year period).

(a) Total Return reflects any fee waivers or reimbursement during the applicable period and would have been lower in their absence.

(b) Portfolio turnover rate is calculated on the basis of the Fund as a whole without distinguishing between classes of shares issued.

(c) Calculated using the average shares method.

(d) The net expense ratio shown for the period is the blended ratio of the current expense limitation in effect as of August 28, 2016 and the higher limit in effect prior to that date.

(e) The net expense ratio shown for the period is the blended ratio of the current expense limitation in effect as of August 28, 2014 and the higher limit in effect prior to that date.

(f) The net expense ratio shown for the period is the blended ratio of the current expense limitation in effect as of August 28, 2013 and the higher limit in effect prior to that date.

(g) Amount is less than \$0.005.

(h) Asia Fund acquired the net assets of another series of the Trust during the year ended April 30, 2018. This acquisition did not affect its portfolio turnover ratio.

See accompanying notes to financial statements.

1. Organization

Mirae Asset Discovery Funds (the “Trust”) is organized as a Delaware statutory trust pursuant to a Declaration of Trust dated April 7, 2010. The Trust is registered as an open-end investment company under the Investment Company Act of 1940 (the “1940 Act”). As of April 30, 2018, the Trust is comprised of the following three funds: Emerging Markets Fund, Asia Fund and Emerging Markets Great Consumer Fund. Each may be referred to individually as a “Fund” and collectively as the “Funds.” A fourth fund, the Emerging Markets Corporate Debt Fund, has not yet commenced operations.

Each Fund is classified as diversified under the 1940 Act. The Funds are authorized to issue an unlimited number of shares of beneficial interest of no par value. Each Fund offers three classes of shares: Class A Shares, Class C Shares, and Class I Shares. Class A, Class C and Class I Shares are identical except as to sales charges, distribution and other expenses borne by each class and voting rights on matters affecting a single class of Shares, and the exchange privilege of each class of shares. Class A Shares of the Funds have a maximum sales charge of 5.75% as a percentage of the offering price. Class C Shares of the Funds are offered without any front-end sales charge but will be subject to a maximum deferred sales charge of 1.00% if redeemed less than one year after purchase. No sales charges are assessed with respect to Class I Shares of the Funds.

Under the Trust’s organizational documents, its officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, in the normal course of business, the Trust enters into contracts with its vendors and others that provide for general indemnification. The Trust’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Trust. However, the Trust expects any risk of loss to be remote.

2. Significant Accounting Policies

The Funds are investment companies and accordingly follow accounting and reporting guidance of the Financial Accounting Standards Board Accounting Standards Codification Topic 946, Financial Services — Investments Companies, as amended. The following is a summary of the significant accounting policies followed by the Funds in the preparation of their financial statements. The policies are in conformity with generally accepted accounting principles in the United States of America (“GAAP”). The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and income and expenses during the reporting period. Actual results could differ from these estimates.

Investment Valuation

The Funds record investments at fair value. Fair value is defined as the value that would be expected to be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The valuation techniques used to determine fair value are further described below.

Equity securities (e.g., preferred and common stocks), exchange-traded funds and rights listed on a national securities exchange, market or automated quotation system for which quotations are readily available, including securities traded over the counter, are valued at their last sale price on the relevant exchange as of the close of regular trading on that exchange. All equity securities that are not traded on a listed exchange or automated quotation system are valued at the last sale price at the close of the US market (i.e., usually the close of the regular trading on the New York Stock Exchange (“NYSE”)) on each day the NYSE is open for trading. On a day that a security does not trade, then the mean between the bid and the asked prices will be used as long as it continues to reflect the value of the security. In the event that market quotations are not readily available, or if the mean between the bid and the asked prices of a non-exchange listed security does not reflect the value of the security, “fair value” of the security will be determined in accordance with fair value procedures approved by the Board of Trustees of the Trust (the “Board”, and the members thereof, the “Trustees”).

Most securities listed on a foreign exchange are valued at the last sale price at the close of the exchange on which the security is primarily traded. In certain countries, market maker prices are used since they are the most representative of the daily trading activity. In the case of certain foreign exchanges, the closing price reported by the exchange (which may sometimes be referred to by the exchange or one or more pricing agents as the “official close” or the “official closing price” or other similar term) will be considered the most recent sale price. Securities not traded on a particular day are valued at the mean between the last reported bid and asked quotes, or the last sale price where appropriate; otherwise fair value will be determined in accordance with fair value procedures approved by the Board.

The Funds may invest in American Depositary Receipts (“ADRs”) as well as other “hybrid” forms of depositary receipts, including European Depositary Receipts (“EDRs”) and Global Depositary Receipts (“GDRs”). These depositary receipts are certificates evidencing ownership of shares of a foreign issuer, and serve as an alternative to directly purchasing the underlying foreign securities in their national markets and currencies. These certificates are issued by depository banks and generally trade on an established market in the United States or elsewhere. The underlying shares are held in trust by a custodian bank or similar financial institution in the issuer’s home country.

Redeemable securities issued by open-end investment companies are valued at the last calculated net asset value, with the exception of securities issued by exchange-traded open-end investment companies, which are priced as equity securities as described above.

Securities for which market quotations are not readily available (including securities for which Mirae Asset Global Investments (USA) LLC (the “Manager”) determines that the closing market prices do not represent the securities’ current value because of an intervening “significant event”) will be valued at fair value pursuant to valuation procedures approved by the Board. Circumstances in which market

quotations may not be readily available include, but are not limited to, when the security's trading has been halted or suspended, when the security's primary trading market is temporarily closed at a time when under normal conditions it would be open, or a significant event with respect to a security or securities has occurred after the close of the market or exchange on which the security or securities principally trades and before the time the Fund calculates the net asset value. The Manager believes that foreign securities values may be affected by volatility that occurs in global markets on a trading day after the close of any given foreign securities markets. The fair valuation procedures, therefore, include a procedure whereby foreign securities prices may be "fair valued" by an independent pricing service or by the Manager's Valuation Committee, in accordance with a valuation policy approved by the Board, to take those factors into account.

Each Fund uses fair value pricing to seek to ensure that such Fund's net asset value reflects the value of its underlying portfolio securities. There can be no assurance, however, that a fair value used by a Fund on any given day will more accurately reflect the market value of a security or securities than the market price of such security or securities. A security's valuation may differ depending on the method used for determining value. Fair valuation of a Fund's portfolio securities can serve to reduce arbitrage opportunities available to short term traders, but there is no assurance that fair value pricing policies will prevent dilution of a Fund's net asset value by short term traders.

The valuation techniques described above maximize the use of observable inputs and minimize the use of unobservable inputs in determining fair value. The inputs used for valuing the Funds' investments are summarized in the three broad levels listed below:

- Level 1 — quoted prices in active markets for identical assets
- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayments speeds, credit risk, etc.)
- Level 3 — significant unobservable inputs (including a Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments.

Pursuant to the valuation procedures noted previously, equity securities are generally categorized as a Level 1 security in the fair value hierarchy (unless there is a fair valuation event, in which case affected securities are generally categorized as a Level 2 security).

A summary of the valuations as of April 30, 2018, based upon the three levels defined above, are identified below for each Fund.

+ For detailed industry descriptions, see the accompanying Schedule of Portfolio Investments.

For the year ended April 30, 2018, there were no Level 3 investments for which significant unobservable inputs were used to determine fair value. The Trust recognizes transfers between fair value hierarchy levels at the reporting period end.

Transfers that occurred from Level 1 to Level 2 on recognition dates due to application of systematic fair value procedures affecting certain international portfolio holdings, and transfers that occurred from Level 2 to Level 1 on recognition dates due to application of systematic fair value procedures affecting certain international portfolio holdings no longer being required are as follows:

	Transfers from Level 1 to Level 2	Transfers from Level 2 to Level 1
Emerging Markets Fund	\$ 33,405,946	\$ —
Asia Fund	34,080,296	—
Emerging Markets Great Consumer Fund	128,870,384	—

Foreign Currency Transactions

The accounting records of the Funds are maintained in US dollars. Non-US dollar denominated amounts are translated into US dollars as follows, with the resultant exchange gains and losses recorded in the Statement of Operations:

- i) value of investment securities and other assets and liabilities at the exchange rate on the valuation date; and
- ii) purchases and sales of investment securities and income and expenses at the exchange rate prevailing on the respective date of such transactions.

The Funds do not isolate realized and unrealized gains and losses attributable to changes in the exchange rates from gains and losses that arise from changes in the value of investments. Such fluctuations are included with net realized and unrealized gain or loss on investments.

Investment income from non-US sources received by a Fund is generally subject to non-US withholding taxes at rates ranging up to 30%. Such withholding taxes may be reduced or eliminated under the terms of applicable US income tax treaties. The Funds may be subject to foreign taxes on gains in investments or currency repatriation. The Funds accrue such taxes, as applicable, based on their current interpretation of tax rules in the foreign markets in which they invest.

Investment Transactions and Related Income

Throughout the reporting period, investment transactions are accounted for no later than one business day following the trade date. For financial reporting purposes, investment transactions are accounted for on trade date on the last business day of the reporting period. Interest income is recognized on an accrual basis and includes, where applicable, the amortization of premiums or accretion of discount. Dividend income is recorded on the ex-dividend date except in the case of foreign securities, in which case dividends are recorded as soon as such information becomes available. Gains or losses realized on sales of securities are determined using the specific identification method by comparing the identified cost of the security lot sold with the net sales proceeds.

Allocations

Expenses directly attributable to a Fund are charged to that Fund, while expenses which are attributable to more than one Fund are allocated among the respective Funds based upon relative net assets or another reasonable basis.

The investment income, expenses (other than class specific expenses charged to a class), realized and unrealized gains and losses on investments of a Fund are allocated to each class of shares based upon relative net assets on the date income is earned or expenses and realized and unrealized gains and losses are incurred.

Distributions to Shareholders

Each of the Funds intends to declare and distribute net investment income at least annually, if any, and distribute net realized capital gains, if any, annually.

The amount of distributions from net investment income and net realized gains are determined in accordance with federal income tax regulations which may differ from GAAP. These “book/tax” differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature (e.g., return of capital, net ordinary loss, distribution reclassification, certain gain/loss and certain distributions), such amounts are reclassified within the composition of net assets based on their federal tax basis treatment; temporary differences (e.g., wash sales, tax treatment of passive foreign investment companies (“PFICs”)) do not require a reclassification. To the extent distributions to shareholders from net investment income and net realized gains exceed net investment income and net realized gains for tax purposes, they are reported as distributions of capital.

Federal Income Taxes

Each Fund intends to qualify each year as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended. A RIC generally is not subject to federal income tax on income and gains distributed in a timely manner to its shareholders. Each Fund intends to make timely distributions in order to avoid tax liability.

Management of the Funds has evaluated tax positions taken or expected to be taken in the course of preparing each Fund’s tax returns to determine whether it is more-likely-than-not (i.e., greater than 50 percent) that each tax position will be sustained upon examination by a taxing authority based on the technical merits of the position. A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in an increase in a liability for taxes payable (or a reduction of a tax refund receivable), including the recognition of any related interest and penalties as an operating expense. Tax positions taken in previous tax years remain subject to examination by tax authorities (generally three years for federal income tax purposes). The determination has been made that there are no uncertain tax positions that would require the Funds to record a tax liability and, therefore, there is no impact to the Funds’ financial statements.

3. Transactions with Affiliates and other Servicing Arrangements

The Trust, on behalf of each Fund, has entered into an Investment Management Agreement between the Manager and the Trust (the “Investment Management Agreement”). Under this agreement, each Fund pays the Manager a fee, accrued daily and payable monthly at an annualized rate of the average daily net assets of each Fund as listed below:

Emerging Markets Fund	1.05%
Asia Fund	1.00%
Emerging Markets Great Consumer Fund	1.05%

The Manager, with respect to each of the Funds, has entered into a sub-management agreement with Mirae Asset Global Investments (Hong Kong) Ltd. (“Mirae Asset Hong Kong” or the “Sub-Manager”) to manage all or a portion of the investments of each Fund.

The Manager has contractually agreed to waive advisory expenses and otherwise reimburse expenses of the Funds in order to limit the annual operating expenses (excluding interest expense, taxes, brokerage commissions, acquired fund fees and expenses and certain other Fund expenses) through August 31, 2018 as follows:

	Class A	Class C	Class I
Emerging Markets Fund	1.50%	2.25%	1.25%
Asia Fund	1.50%	2.25%	1.25%
Emerging Markets Great Consumer Fund	1.50%	2.25%	1.25%

Waivers and reimbursements under this agreement are accrued daily and paid monthly.

Additionally, pursuant to the expense limitation agreement, each Fund has agreed to repay amounts waived or reimbursed by the Manager with respect to such Fund for a period of up to three fiscal years after such waiver or reimbursement was made. Such repayments are subject to approval by the Board, and are permissible to the extent such repayments would not cause the expenses of a Fund to exceed the limits described above. As of April 30, 2018, the repayments that may potentially be made by the Funds are as follows:

	Expires 4/30/19	Expires 4/30/20	Expires 4/30/21	Total
Emerging Markets Fund	\$250,725	\$192,681	\$241,525	\$ 684,931
Asia Fund	237,924	221,569	242,174	701,667
Emerging Markets Great Consumer Fund	321,529	677,501	564,223	1,563,253

Citi Fund Services Ohio, Inc. (“Citi”), a wholly owned subsidiary of Citibank, N.A., serves as the Trust’s administrator and fund accounting agent and receives fees for such services in accordance with a master services agreement with the Trust, on behalf of the Funds. Citi voluntarily waived a portion of its fees during the year ended April 30, 2018 as indicated on each Fund’s Statement of Operations under the caption “Fees voluntarily reduced by the Administrator.” Each Fund’s ratio of net expenses to average net assets was unaffected by these voluntary waivers due to contractual expense limit described above.

FIS Investor Services LLC (“FIS”) serves as transfer agent for the Funds under a transfer agency agreement and receives fees for its services.

Citi also receives fees for certain additional services and reimbursement for out-of-pocket expenses. Citibank, N.A. serves as custodian for the Funds. For its services as custodian, the Funds pay Citibank, N.A. a fee based on a percentage of assets held on behalf of the Funds, plus certain out-of-pocket charges. Such percentages vary by the jurisdiction in which the assets are held.

The Funds have an uncommitted \$10,000,000 demand line of credit facility with Citibank, N.A., expiring August 1, 2018. Borrowings under this facility bear interest at rates determined at the time of such borrowings, if any. During the year ended April 30, 2018, the borrowings were as follows:

	Amount Borrowed	Date of Borrowing		Interest Rate
		Start	End	
Emerging Markets Fund	\$2,800,000	February 9, 2018	February 20, 2018	2.469%
Asia Fund	7,400,000	December 26, 2017	January 4, 2018	2.479%

Interest charged under this facility during this year ended April 30, 2018 are identified as Line of credit fees on the accompanying Statements of Operations.

Funds Distributor, LLC (the “Distributor”) serves as the distributor of each Fund. The Trust, on behalf of each Fund, has adopted plans with respect to Class A and Class C Shares that allow each Fund to pay distribution fees for marketing, distribution and sale of those share classes under Rule 12b-1 of the 1940 Act, and shareholder servicing fees for certain services provided to its shareholders. Class A Shares pay a 12b-1 fee at an annual rate of 0.25% of average daily net assets. Class C Shares pay a 12b-1 fee at an annual rate of 1.00% of average daily net assets. The Distributor may use up to 0.25% for shareholder servicing of Class C Shares and up to 0.75% may be used for distribution of Class C Shares. The distributor received commissions from the sale of Class A and Class C Shares of the Funds during the year ended April 30, 2018 as follows:

	Class A	Class C
Emerging Markets Fund	\$ 1,602	\$ —
Asia Fund	1,333	—
Emerging Markets Great Consumer Fund	11,748	—

For the year ended April 30, 2018, the brokerage commissions paid by each Fund to broker/dealers affiliated with the Manager on the execution of each Fund’s purchases and sales of portfolio investments were as follows:

	Name of Affiliate Broker/Dealer	Aggregate Amount of Brokerage Commissions Paid to Affiliate
Emerging Markets Fund	Mirae Asset Securities (Hong Kong) Ltd.	\$ 7,017
Asia Fund	Mirae Asset Securities (Hong Kong) Ltd.	10,250
Emerging Markets Great Consumer Fund	Mirae Asset Securities (Hong Kong) Ltd.	18,965

Certain officers and Trustees of the Trust are officers of the Manager or Citi and receive no compensation from the Funds for such services.

4. Securities Transactions

The cost of security purchases and the proceeds from the sale of securities (excluding securities maturing less than one year from acquisition) during the year ended April 30, 2018 were as follows:

	Purchases	Sales
Emerging Markets Fund	\$ 70,232,310	\$ 27,004,444
Asia Fund	62,335,709	61,374,370
Emerging Markets Great Consumer Fund	189,235,872	105,178,445

5. Investment Risks

Asset Allocation Risk

Each Fund's ability to achieve its investment objective will depend, in part on the investment manager's ability to select the best asset allocation of assets across the various developed and emerging markets. This is a risk that the manager's evaluations and assumptions may be incorrect in view of actual market condition.

Concentration Risk

Concentration risk results from maintaining exposure to a limited number of issuers, industries, market sectors, countries or geographical regions. A fund that concentrates its investments will be more susceptible to risks associated with that concentration and will be more sensitive to adverse impact from credit risk relating to such issuers than a fund that is more diversified. Funds that focus their investments in particular countries or geographic regions may be particularly susceptible to economic, political or regulatory events affecting those countries or regions. These Funds may be more volatile than a more geographically diversified fund. The Schedules of Portfolio Investments provide information on each Fund's holdings, including industry and/or geographical composition, as relevant.

Emerging Markets Risks

The risks of foreign investments are typically greater in less developed countries. Risks of investment in developing or emerging economies and markets include (i) less social, political, and economic stability; (ii) the smaller size of the securities markets and the lower volume of trading, which may result in a lack of liquidity and in great price volatility; (iii) certain national policies that may restrict the Funds' investment opportunities, including restrictions on investment in issuers or industries deemed sensitive to national interests, or expropriation or confiscation of assets or property, which could result in the Funds' loss of their entire investment in that market; (iv) less developed legal and regulatory structures governing private or foreign investment or allowing for judicial redress for injury to private property; (v) inaccurate, incomplete or misleading financial information on companies in which the Funds invest; (vi) securities of companies may trade at prices not consistent with traditional valuation measures; (vii) limitations on foreign ownership, which may impact the price of a security purchased or held by the Funds; and (viii) higher levels of inflation, deflation or currency devaluation relative to more developed markets.

Equity Securities Risk

Equity securities include common and preferred stocks. Stock markets are volatile. The value of equity securities is affected by changes in a company's financial condition and overall market and economic conditions. Preferred stock may be subject to optional or mandatory redemption provisions.

Foreign Securities Risk

Foreign securities, foreign currencies, and securities issued by US entities with substantial foreign operations can involve additional risks relating to political, economic, or regulatory conditions in foreign countries. These risks include fluctuations in foreign currencies; imposition of additional taxes; trading, settlement, custodial and other operational risks; and risk arising from the less stringent investor protection and disclosure standards of some foreign markets. All of these factors can make foreign investments more volatile and potentially less liquid than US investments. In addition, foreign markets can perform differently from the US market.

Growth Investing Risk

Investments in growth focused companies may be more volatile than other stocks or the market as a whole. Growth focused companies may be in early stages of business development or have smaller market capitalizations causing their securities to be more sensitive to economic downturns in the broader market. The price of securities issued by growth-focused companies may be more sensitive to the companies' current or expected earnings.

6. Federal Income Tax Information

At April 30, 2018, the Funds had net capital loss carryforwards (“CLCFs”) for federal income tax purposes which are not subject to expiration and which are available to reduce the future capital gain distributions to shareholders:

CLCFs originating in the current tax year and not subject to expiration:

	Short-Term Amount	Long-Term Amount	Total
Asia Fund	\$ 3,353,297	\$ —	\$ 3,353,297
Emerging Markets Great Consumer Fund	11,247,455	—	11,247,455

Asia Fund’s ability to use the CLCFs of Asia Great Consumer Fund (see the Acquisition of Fund note, below) may be limited by loss limitation rules under federal tax law.

During the year ended April 30, 2018, the following Funds utilized CLCFs to offset realized capital gains:

	Amount
Emerging Markets Fund	\$ 845,698
Asia Fund	6,922,339
Emerging Markets Great Consumer Fund	15,509,370

Under current tax law, capital losses and net investment losses realized after October 31 and December 31, respectively, of a Fund’s fiscal year may be deferred and treated as occurring on the first business day of the following fiscal year for tax purposes. The following Funds’ deferred losses are as follows:

	Post October Loss Deferred	Post October Currency Loss Deferred and Late Year Ordinary Loss Deferred	Total
Emerging Markets Great Consumer Fund	\$ —	\$671,596	\$671,596

As of April 30, 2018, the following reclassifications have been made to increase (decrease) such accounts with offsetting adjustments as indicated:

	Accumulated Net Investment Income	Accumulated Net Realized Gains	Paid in Capital
Emerging Markets	\$ (12,791)	\$ 12,792	\$ (1)
Asia Fund	96,442	(8,258,248)	8,161,806
Emerging Markets Greater Consumer Fund	368,209	438,309	(806,518)

As of April 30, 2018, the components of accumulated earnings (deficit) on a tax basis were as follows:

	Undistributed Ordinary Income	Undistributed Long Term Capital Gains	Accumulated Earnings	Accumulated Capital and Other Losses	Unrealized Appreciation/ (Depreciation) ^(a)	Total Accumulated Earnings/ (Deficit)
Emerging Markets Fund	\$1,841,636	\$ 997,470	\$2,839,106	\$ —	\$ 1,807,079	\$ 4,646,185
Asia Fund	806,476	5,106,580	5,913,056	(3,353,297)	6,141,995	8,701,754
Emerging Markets Great Consumer Fund	—	—	—	(11,919,051)	41,654,268	29,735,217

(a) The difference between book-basis and tax-basis unrealized appreciation/depreciation is attributable primarily to tax deferral of losses on wash sales.

At April 30, 2018, the tax cost, gross unrealized appreciation and gross unrealized depreciation on securities, for federal income tax purposes, were as follows:

	Tax Cost	Tax Unrealized Appreciation	Tax Unrealized Depreciation	Net Unrealized Appreciation/ (Depreciation)
Emerging Markets Fund	\$ 67,739,184	\$ 4,634,758	\$(2,792,150)	\$ 1,842,608
Asia Fund	56,579,247	8,543,222	(2,275,947)	6,267,275
Emerging Markets Great Consumer Fund	227,085,956	47,692,935	(5,870,210)	41,822,725

7. Control Ownership and Principal Holders

The beneficial ownership, either directly or indirectly, of more than 25% of the voting securities of a Fund creates presumptions of control of the Fund, under section 2(a)(9) of the 1940 Act. As of April 30, 2018, the Funds have individual shareholder accounts and/or omnibus shareholder accounts (comprised of a group of individual shareholders), and representing ownership as follows:

	Beneficial Ownership
Emerging Markets Fund	27%
Asia Fund	43%
Emerging Markets Great Consumer Fund	64%

8. Acquisition of Fund

Effective as of the close of business December 1, 2017, the Asia Fund acquired all of the assets and liabilities of the Asia Great Consumer Fund (“Acquired Fund”), a series of the Trust, pursuant to a plan of reorganization (the “Plan”) approved by the Board on September 12, 2017. The acquisition was accomplished by a tax-free exchange of 501,846 Class A shares, 377,341 Class C shares and 3,510,677 Class I shares of the Asia Fund, valued at \$6,629,940, \$4,693,976 and \$47,381,496, respectively, for 429,134 Class A shares, 320,980 Class C shares and 3,016,995 Class I shares, respectively, of equal aggregate value, of the Acquired Fund outstanding as of the close of business December 1, 2017.

Pursuant to the Plan, all of the assets and liabilities of the Acquired Fund were transferred to the Asia Fund. At the close of business December 1, 2017, the Acquired Fund’s net assets had a fair value of \$58,703,225 and identified cost of \$46,431,322. For financial reporting purposes, assets received and shares issued by the Asia Fund were recorded at fair value; however, the cost basis of the investments received from the Acquired Fund was carried forward to align ongoing reporting of the Asia Fund’s realized and unrealized gains and losses with amounts distributable to shareholders for tax purposes. Immediately prior to the merger, the Asia Fund’s net assets were \$17,778,916. All fees and expenses incurred by the Acquired Fund and the Asia Fund directly in connection with the Plan were borne by the Manager as provided by the Plan.

Assuming the acquisition had been completed on May 1, 2017, the beginning of the annual reporting period of the Asia Fund, the Asia Fund’s pro forma results of operations for the year ended April 30, 2018, are as follows:

Net investment income (loss)	\$ (66,999)
Net realized/unrealized gains (losses)	18,944,256
Change in net assets resulting from operations	<u>\$18,877,257</u>

Because the combined investment portfolios have been managed as a single integrated portfolio since the acquisition was completed, it is not practicable to separate the amounts of revenue and earnings of the Acquired Fund that have been included in the Asia Fund’s statement of operations since December 2, 2017.

Asia Fund did not purchase or sell securities following the acquisition for purposes of realigning its investment portfolio. Accordingly, the acquisition of the Acquired Fund did not affect Asia Fund’s portfolio turnover ratio for the year ended April 30, 2018.

9. Subsequent Events

Management evaluated subsequent events through the date these financial statements were issued and concluded no such events require recognition or disclosure in these financial statements.

Mirae Asset Discovery Funds
April 30, 2018

Report of Independent Registered Public Account Firm

To the Shareholders and Board of Trustees of
Mirae Asset Discovery Funds

Opinion on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the schedules of portfolio investments, of Mirae Asset Discovery Funds comprising the Emerging Markets Fund, Asia Fund and Emerging Markets Great Consumer Fund (the "Funds") as of April 30, 2018, and the related statements of operations and changes in net assets and the financial highlights for the year then ended, including the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of April 30, 2018, the results of their operations, changes in their net assets and the financial highlights for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

The Funds' financial statements and financial highlights for the years ended April 30, 2017 and prior, were audited by other auditors whose report dated June 26, 2017, expressed an unqualified opinion on those financial statements and financial highlights.

Basis for Opinion

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits include performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and confirmation of securities owned as of April 30, 2018, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the Funds' auditor since 2017.

Mirae Asset Discovery Funds
Other Information (Unaudited)

Change in Independent Registered Public Accounting Firm

On July 7, 2017, Ernst & Young LLP (“Ernst & Young”) resigned as the Funds’ independent registered public accounting firm. During the Funds’ two most recent fiscal years ended April 30, 2016 and 2017, Ernst & Young’s reports on the Funds’ financial statements contained no adverse opinion or disclaimer of opinion, nor were they qualified or modified as to uncertainty, audit scope, or accounting principles. During the Funds’ two most recent fiscal years ended April 30, 2016 and 2017 and the interim period commencing May 1, 2017 and ending July 7, 2017, there were no disagreements with Ernst & Young on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreements, if not resolved to the satisfaction of Ernst & Young, would have caused it to make reference to the subject matter of the disagreement in connection with its report on the financial statements for such years.
