© 2022 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Past performance is no guarantee of future results.

<sup>2</sup>The **MSCI Emerging Markets NR Index** is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets. An investor cannot invest directly in an index. Net total return indices reinvest dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

<sup>3</sup>**Active share** – Percentage of shares in a portfolio that differs from the benchmark index. Source: FactSet

Data source for below characteristics: Zephyr StyleADVISOR

<sup>4</sup>**Alpha** – Measures the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta.

<sup>5</sup>**Beta** – Measure of systematic risk with respect to a benchmark. The beta of a market is 1.00 by definition.

<sup>6</sup>**Sharpe Ratio** – Is a risk-adjusted performance statistic that measures reward per unit of risk. The higher the Sharpe Ratio, the better a fund's risk adjusted performance.

### RISK FACTORS

**Equity Securities (stocks)** are more volatile and carry more risk than other forms of investments, including investments in high-grade fixed income securities. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes.

**Emerging Market** investing may be subject to additional legal, economic, political, liquidity, and currency risks not associated with more developed countries.

**Geographic Concentration Risk** — A small number of companies and industries may represent a large portion of the market in a particular country or region, and these companies and industries can be sensitive to adverse social, political, economic or regulatory developments in that country or region. *An investor should consider the Fund's investment objectives, risks, charges and expenses carefully before investing. This and other important information about the investment company can be found in the Fund's prospectus and summary prospectus. To obtain a prospectus or summary prospectus, contact your financial advisor or call (888) 335-3417. Please read the prospectus carefully before investing.*
